To Whom it May Concern,

- 1 [I am writing to you to voice my concerns regarding the Yucca Mountain site as the location for the nation's nuclear waste. There are many sound legal and environmental reasons to reject this site as a nuclear dumping ground which I am certain others have contacted you about. One has to ask themselves whether or not they would want any of their own hundreds of generations of children to have to knowingly avoid any of the areas in the future that may have this leaked radioactive material.]
- 2 [My statement will be regarding the responsibility of the private businesses that will be running these plants that create the waste. Are they making enough money from selling this kind of energy to fund the guarding of the waste material for 20,000 years into the future? That is the true cost of the energy. The actual price they charge needs to reflect it. If not, then one group of people (residents of Nevada and all future residents of Nevada and California for the next 20,000 years) will pay in ill health, or shortened lives. Is this morally right?]

Yours truly,
Lisa Orr
